

DWARKESH GOHEL

Web Developer

Veraval, Gujarat, +916353362162, [Email](#) [Portfolio](#)

PROFILE

I'm a versatile React js developer, designer, and game developer with a passion for creating engaging digital experiences. Skilled in coding, design, and building interactive scenes for web and games, I enjoy learning new tools and pushing creative boundaries across platforms.

EXPERIENCE

Bonzark.

June-2024 -> Present

- **Klimate** (React, tanstack query, aws, MUI, Restapi)
 - Built a dynamic qualitative question module with government-compliant validations.
 - Work on user management module(Klimate is the app where company gets all type of carbon emission analytics)
- **Liberty International** (React, Redux, Nodejs, MUI)
 - Developed hotel listing integration with third-party aggregators and implemented a comprehensive hotel booking management system.(Liberty International is a platform to book hotel and plan a travelling plan)

Plutus Technologies Pvt Ltd.

Feb-2023 -> June 2024

- **Property Watch** (React, Redux, Firebase, Bootstrap, Scss, RestAPI)
 - Built Property Watch from scratch using React.js and Firebase for auth and data management. Designed intuitive UIs and implemented daily deployments for continuous improvements and client satisfaction.(Property Watch is a comprehensive web application designed to facilitate property inspection and collaboration management specifically tailored for users in the US and Canada.)
- **INSIDE** (React, Node, Express, SQL, Redux, PrimeReact, Scss, RestAPI)
 - Developed a full-featured web portal from scratch with scalable, reusable layouts using modern tech. Led weekly planning meetings and managed backend ops with Node.js and SQL, ensuring policy integration and data integrity.(Inside is an EMS platform encompassing time tracking, leave management, project oversight, client relations, employee reporting, policy management, and an HR portal for comprehensive HR and project management solutions.)
- **TSP** (React, Redux, Express, Node, SQL, Mapbox, Stripe)
 - Optimized database schema and built scalable UI to enhance performance and user experience. Managed role-based access, integrated email and

payment systems, used Mapbox for maps, and developed robust backend APIs.

(Tiffin Service Provider is an innovative platform connecting users with tiffin providers for daily orders, featuring seamless online payment options and provider analytics for enhanced user experience and business insights.)

Contract.

Jun-2022 -> Dec-2022

- **PartNote** (Nextjs, Typescript, Convex, LiveBlocks, Tailwind)
 - Developed Partnote from scratch to deployment, utilizing TypeScript and implementing new authentication mechanisms like Clerk.
 - Managed real-time actions on shared boards, integrated a real-time database with Convex, and designed the UI using Figma for a seamless user experience

(Partnote is a real-time collaborative notes-taking web application for seamless teamwork, featuring organization management capabilities to streamline communication within teams.)

EDUCATION

Master of Computer Application (**MCA**) 2023
(Gujarat Technological University)

Bachelor of Computer Application (**BCA**) 2021
(Gujarat Technological University)

SKILLS

Frontend

React, Nextjs, Redux, Shadcn, Tailwind,
Bootstrap, Scss, Figma, Illustrator, Photoshop

Utils: Git, Jira, FileZilla

Game Development: Unity, C#, Blender

Backend

Express, Node, Convex, SQL,
MongoDB, AWS, Firebase, Stripe
socket.io,

CERTIFICATES

HackerRank (React)
